- SO/WO Dashboard [.NET] 4180
 - From Sales order entry lines screen:
 - Customer Part (Named Cust PO Line)
 - Price USD
 - Extended Price
- Sales History Dashboard
 - Customer Part
- APS > View > Open Work Orders
 - Customer Part (Name Cust PO Line)
 - In the code, had to reference ORDER_TO_WO table to make connection from Work Order to a Sales order, as there was no existing sales orders, or line numbers on there already.
- Shipping and Receiving > View > Shipping Dashboard
 - Customer Part (Named Cust PO line)
